

Quality & environment

ENR is a frontrunner in applying the most modern techniques in our two production plants. We continuously invest in new production means and methods that guarantee quality and protect the environment.

Quality

Our focus on continuous improvement and innovation ensures that we can work more efficiently and effortlessly meet the ever-increasing quality requirements of you, our customers. Our quality system has been **ISO 9001** certified since many years. In addition, our raw materials and end products are subjected to inspections and tests in our modern laboratory. This allows us to guarantee a top-quality product for you!

Environment & CSR

Aided by modern techniques, we increasingly work energy-efficiently and strive to reduce our waste percentage. We continuously adjust our goals, in accordance with **ISO 26000** – Corporate Social Responsibility. CSR is at the forefront of our objectives as an organisation. In all aspects, we try to contribute to a better society.

Where specialism meets flexibility

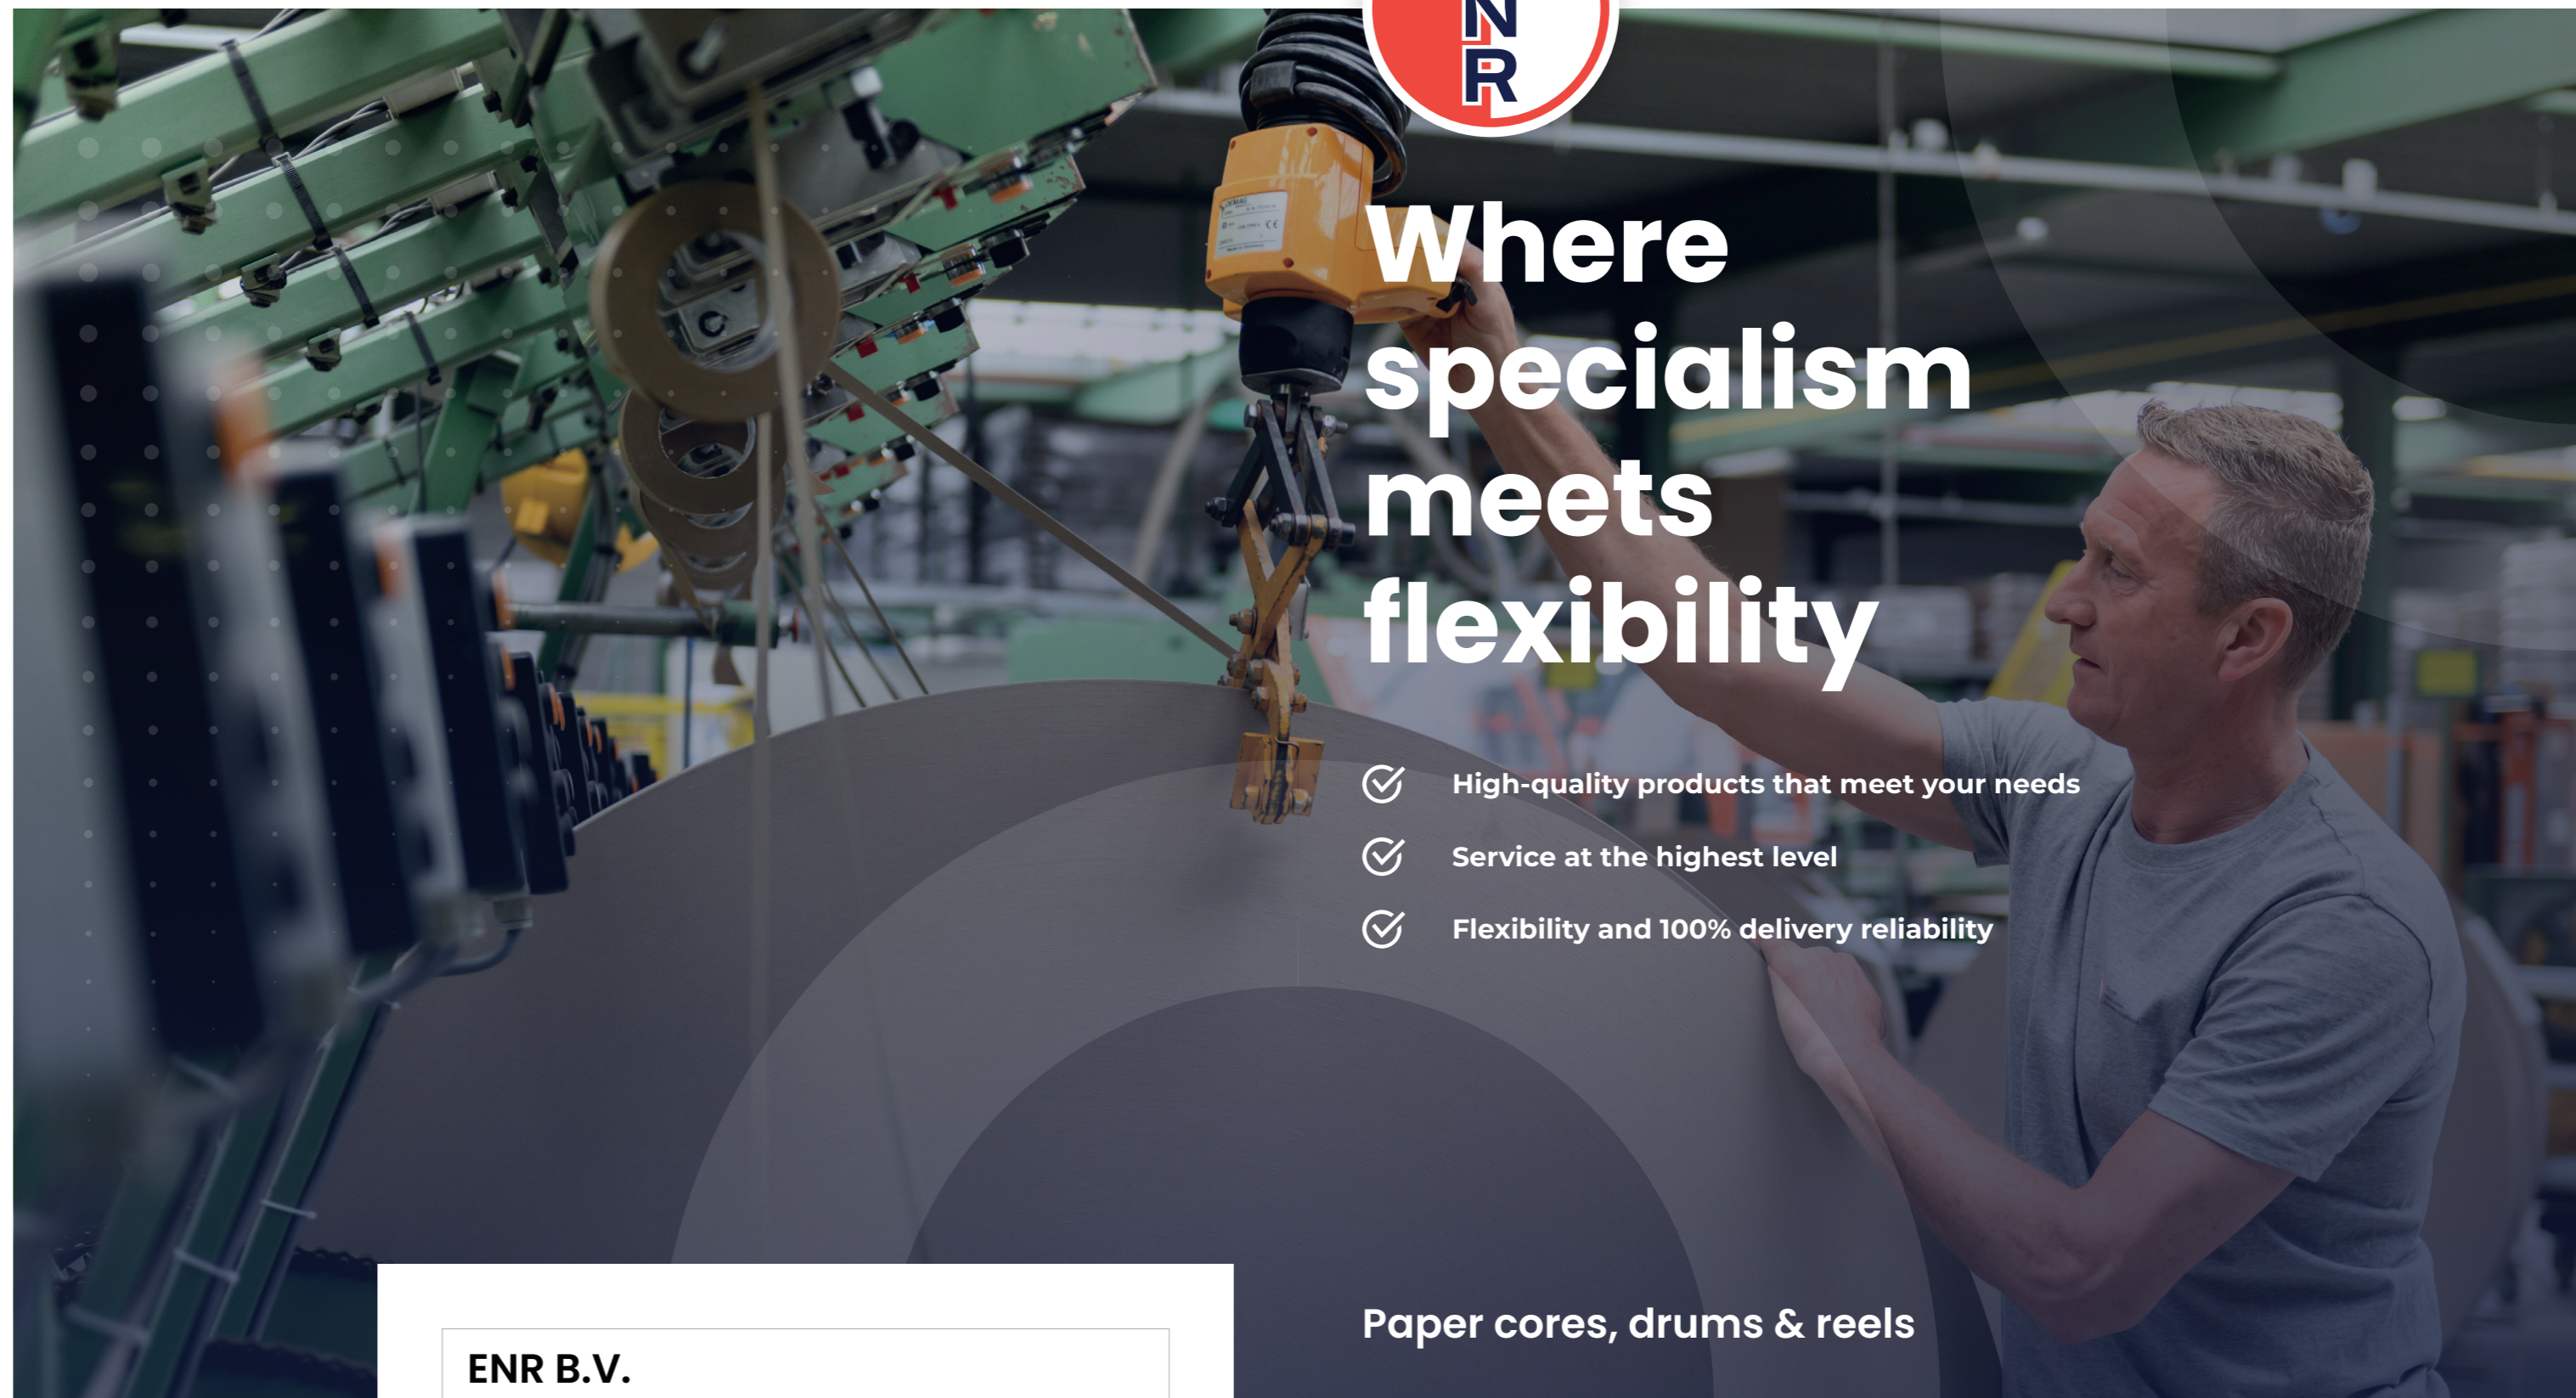

- ✓ High-quality products that meet your needs
- ✓ Service at the highest level
- ✓ Flexibility and 100% delivery reliability

About us

We are intrinsically motivated to keep improving ourselves. Through constant innovation we continue to improve our products and optimise our customer service. This is how we develop the best solutions for our customers to help them overcome the obstacles that they face.

That's what you can expect from ENR. Strong values like quality, service and a focus on people are deeply rooted in our organisation.

As a consequence, you can always count on a flexible partner who thinks ahead and is determined to deliver the best results.

ENR. Where specialism meets flexibility.

What we deliver

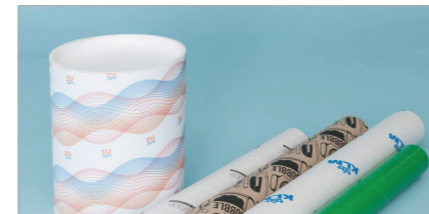

Paper cores

We are specialists in the production of paper cores. All our cores are tailor-made for each specific market. Do you want cores for material to roll up, cores to pack your product, printed cores, cores with special dimensions or cores that can withstand extreme winding speeds? We're here to meet your requirements!

Our cores can be used for:

Film & flexible packaging

Shipping & packaging

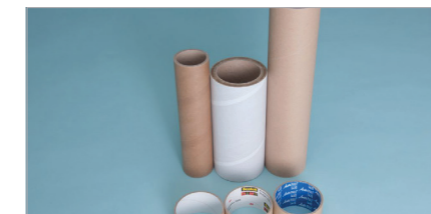

Strapping

Paper & tissue

Carpeting

Labels & tape

Textile & non-woven materials

Paper reels

ENR produces cardboard spools for the wire, rubber, 3D filament and cable industries. Our extensive experience has led us to develop a broad range of reels and spools, tailor-made to specific customer requirements. Whether you're looking for a reel made of 100% cardboard, or one that is easy to assemble yourself from individual parts, or that is personalised with your own design, ENR can supply what you need!

Paper drums

Our all-fibre drums are environmentally friendly and cost-effective. They are the alternative to the conventional round fibre drum and, because of the square shape, delivers many logistical benefits. Our square barrels are used for packaging in the chemical, pharmaceutical and food industries.

- 100% cardboard
- Save up to 50% of space
- CO2-neutral product
- Highest UN-certificate, Class X

Our sister company Carré Karton is the producer of our paper drums. Would you like to get more information? Visit our website: www.carrekarton.nl
